# We know the challenge

Keep your companies name out of the news

Protect suppliers data

Protect consumers data and privacy

Protect transactions

And give me access to everything everywhere  
all the time

# Information Security Driving Solutions

**ORGANIZATIONS ARE  
LOOKING FOR  
SYSTEMS TO  
AUTOMATE  
REGULATORY  
COMPLIANCE**

## Sarbanes-Oxley

- Improving Transparency and Accountability of Business Process
  - Organizations must implement suitable internal controls
  - Identify the framework
  - Assess effectiveness

## Gram-Leach-Bliley (GLB)

- Financial Services Protection of Customer information
  - Security and confidentiality of data
  - Mitigation of risk
  - Unauthorized access to data

## HIPAA

- Protection of Patient Records while Reducing Fraud and Abuse of Insurance
  - Electronic and physical safeguards on data
    - Hazards (Natural, Environmental and Intrusion)

- **Access Rights**
- **Information Protection**
- **Audit-ability**

# It's not about the market for security

- It's about
  - Reducing the cost of business
  - Enabling lower cost transactions
  - Improving productivity
  - Building seamless business networks
  - Stronger customer relations

Trust Enabled by Security is a Platform for  
business

## So What is the Industry DOING ABOUT IT?

- 106 + Companies have joined the Trusted Computing Group
- Microsoft, Dell, Intel, AMD, IBM, HP and others are “all” fully supporting implementations
- The PC Manufacturers are SHIPPING and have shipped Millions of units
- The Industry Platform for Trusted Relationships, Trusted Transactions and Trusted applications is **HERE**.
- The big questions is how will the world change when all PCs are trusted PCs

# TPM Enabled PC's Shipped Growing Dramatically (Source: IDC)

# Introducing the industry standard

- Enables Strong authentication for all PCs
- Enables Strong data protection for every computer
- Provides Protection for the users personal information and credentials
- Provides a foundation of trust for all antivirus, anti-phishing and other security applications
- Enables the power of trusted network connections
- Extends to mobile, network and peripheral products

# Product Implementations

## TPM Vendors:

Atmel\*  
Broadcom\*  
Infineon\*  
Winbond\*  
Sinosun\*  
STMicroelectronics\*

## TCG Solutions:

M-Systems\*  
NTRU\*  
Softex\* (Omni Pass and Theft Guard)  
Utimaco\* (SafeGuard)  
Verisign\* (Personal Trust Agent)  
Wave Systems\* (Embassy Trust Suites)

## TCG Enabled Systems:

Dell (Latitude, Optiplex)  
Fujitsu (LifeBook Notebook & Desktop systems)  
HP\* (HP Protect Tools)  
IBM\* (Embedded Systems Solution)  
Intel\*(Intel® Desktop Board D865GRH)  
Toshiba

# WAVE Security Solutions

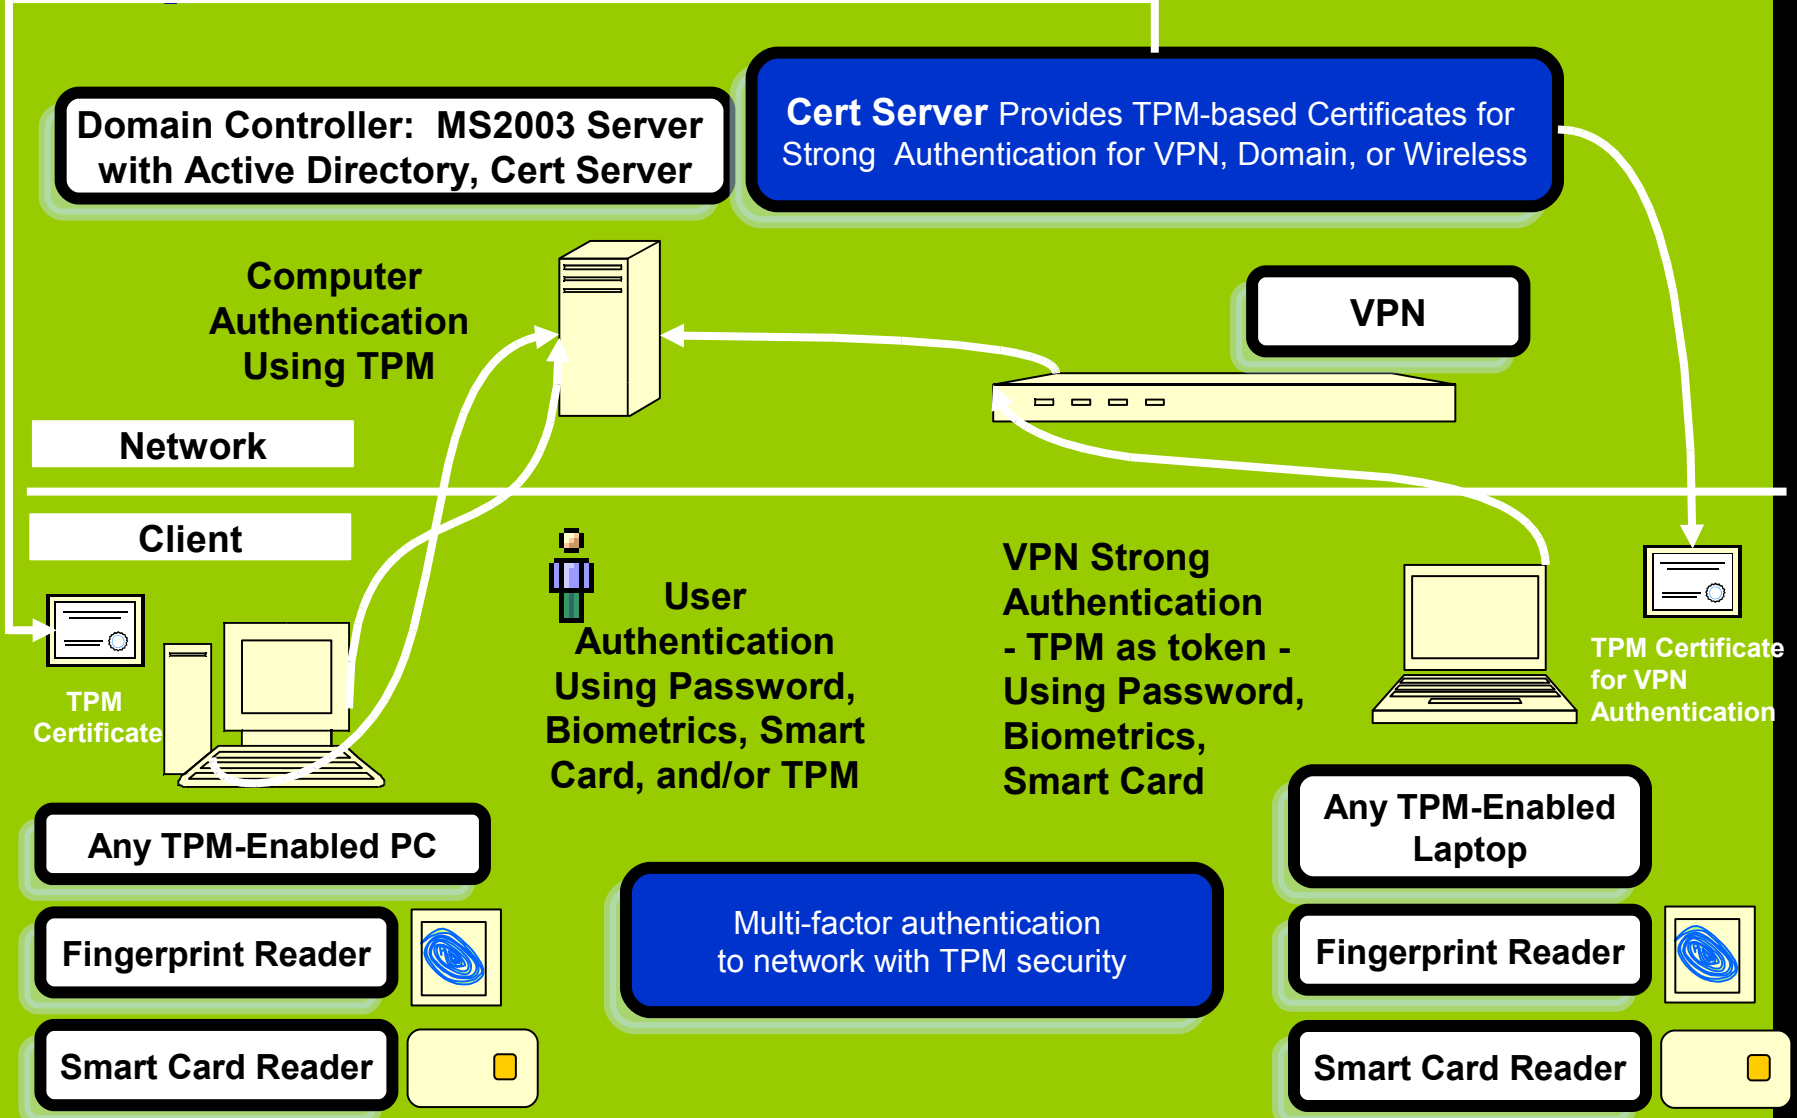

Wave's trusted computing solutions consist of a suite of client applications and servers infrastructure for enterprise

## TCG-compliant software solutions for TPM-enabled PCs

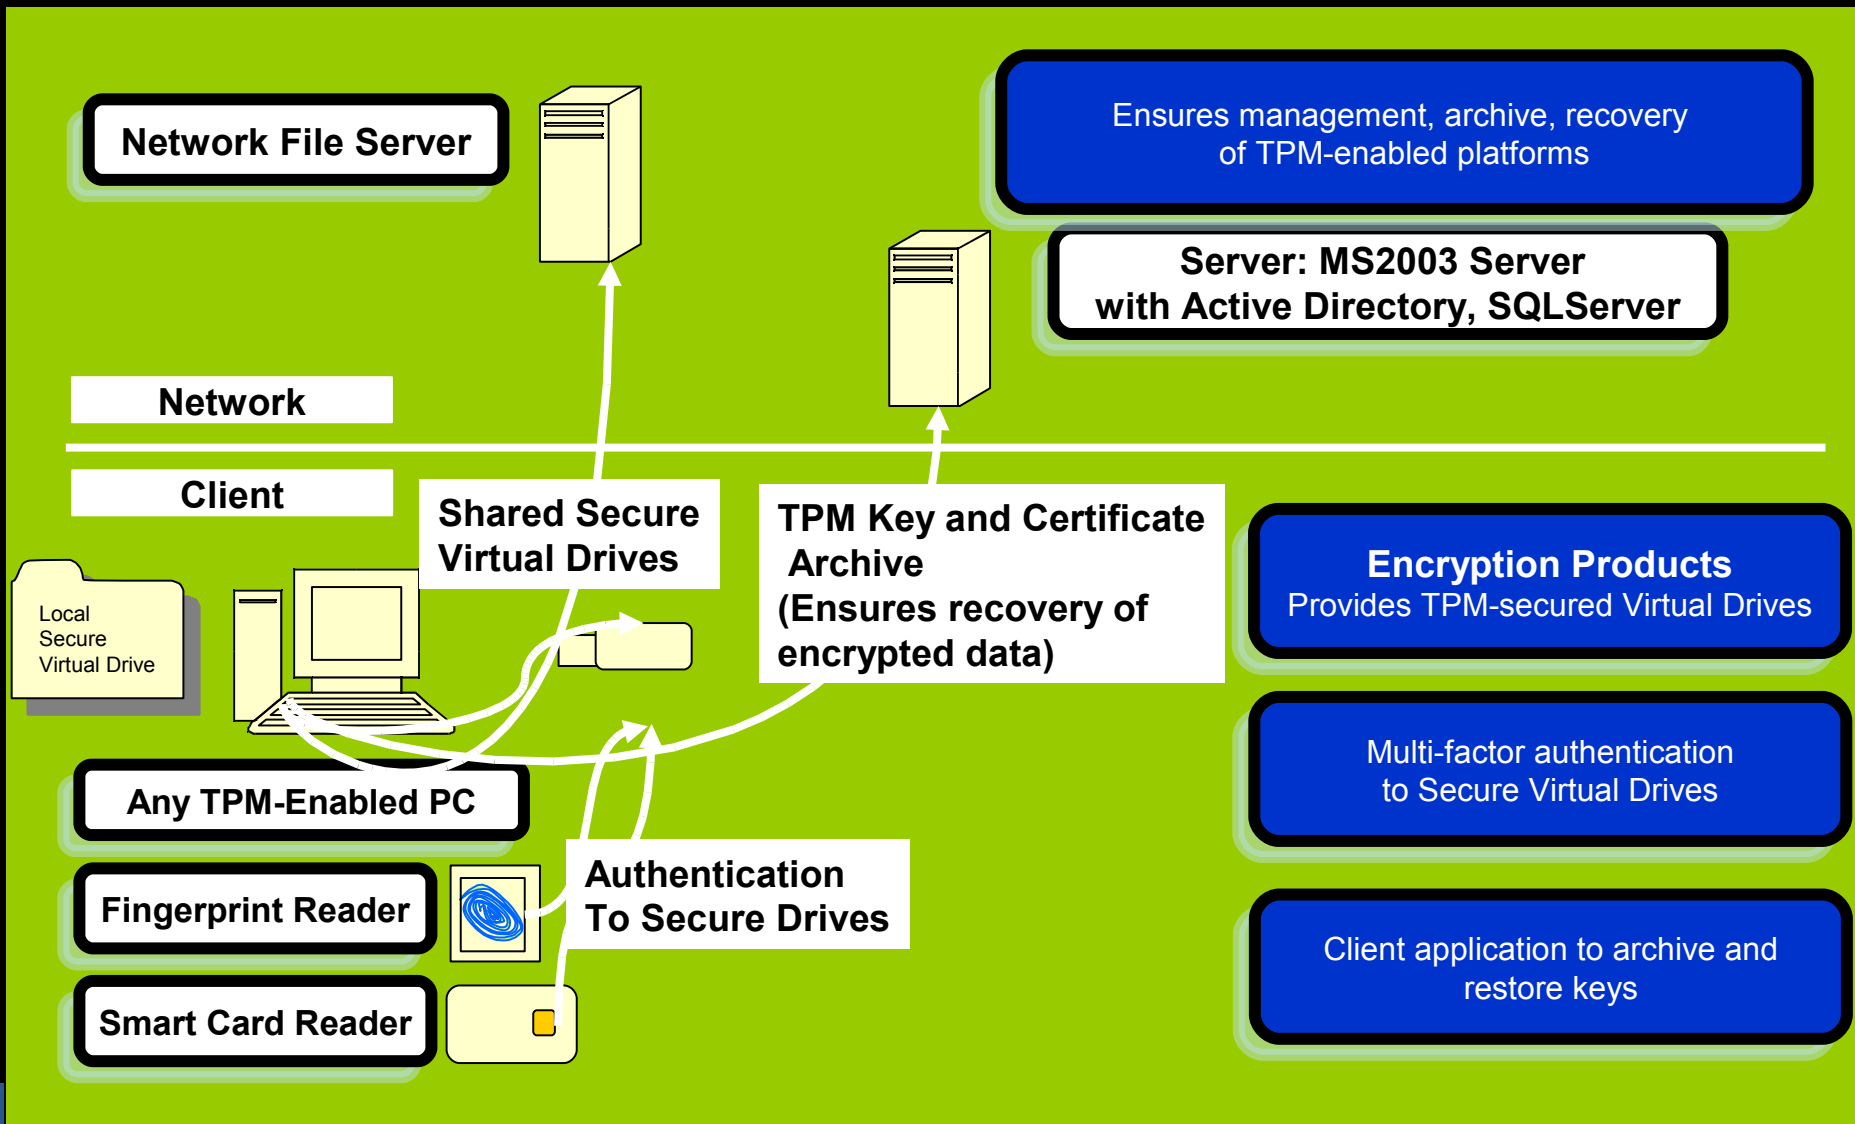

- TCG-Enabled CSP
- Automated password management for convenience and protection
- Hardened data protection to meet the latest enterprise requirements
- Multifactor authentication to Windows and secure applications
- Strong authentication for remote access through Virtual Private Networks
- Remote TPM keys and certificates management and recovery

# Example: Network Authentication

# Example: Data Protection and Key Management

# Network Access Control

Firewall Check

Virus Check

Patch Check

# Infrastructure Building Blocks

Integrity

Measurement

Devices, Apps, People  
 State of Platforms  
 Credentials

Network

Authentication

Users, Platforms  
 Network Access Control

Asset Management

and Tracking

Deployment, Operation  
 Retirement, Lost/Stolen Devices

**TCG - The  
 Management  
 Infrastructure  
 For Security**

Remote

Management

Setup  
 Issues Management

Security Policies

IT Management  
 and Control

Data Migration

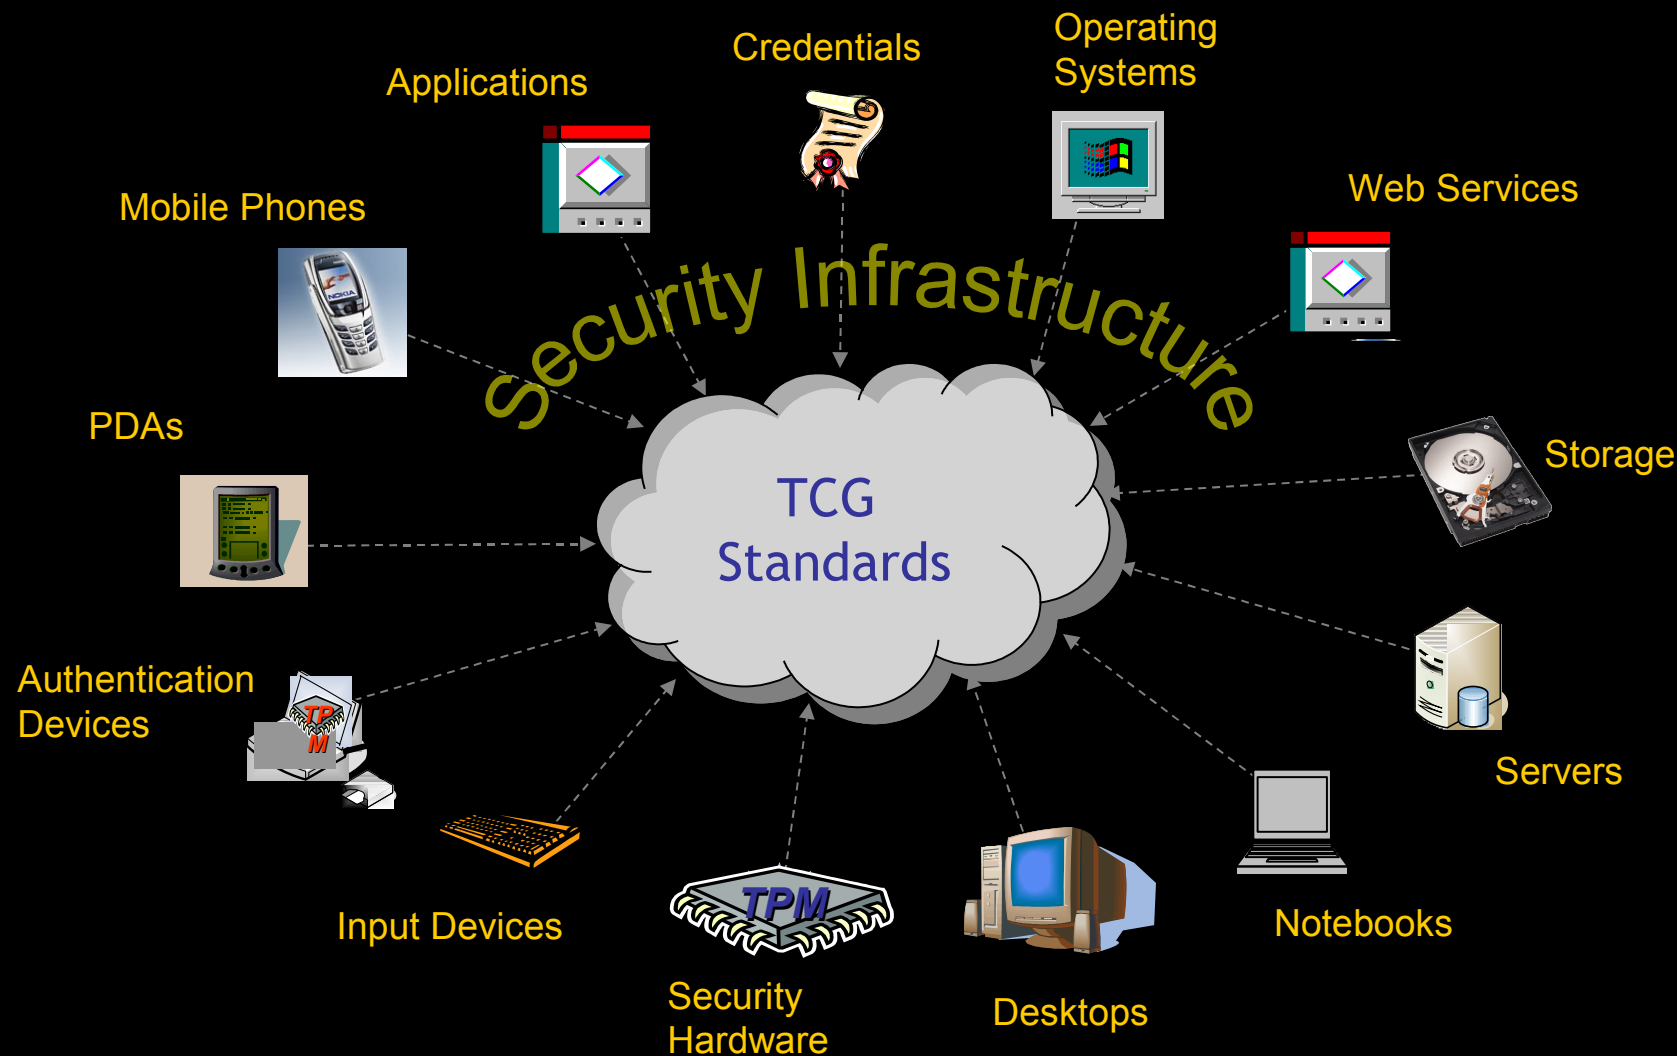

and Synchronization

Between Trusted Devices

Key Management

Backup, Disaster Recovery  
 Device Replacement

# The "BIG" Picture

# Impacting the Existing network

- 802.1X
- Identity Management
- Security and IT Capabilities
- Automated Password Management
- Business Continuity
- Client-side Biometrics
- Quarantine & Containment
- Vulnerability Management
- Encryption (AES)
- Security Audit Capabilities

# Summary

- Trusted computing will change the way all internet business is done.
- An industry standard for security has emerged
- Trusted Computing is a required component for any security architecture
- Trusted Computing will help reduce the complexity of deploying solutions and Improve interoperability

## Conclusion

*Make sure your next computer is  
a trusted computer*
